- Mulching
- Weekly Weed Control
- Weekly Mowing
- Leaf Removal
- Shrub Pruning & Shearing
- Tree Pruning
- Irrigation
- Aeration

COMMERCIAL LANDSCAPING

Our year begins with spring cleanup to our commercial properties and the addition of a fresh layer of hardwood mulch. As needed throughout the growing season, we provide hand pruning and mechanical hedge shearing. Our professional mowing crews provide high quality weekly, or more frequent if needed, mowing services coupled with landscape bed weed control to maintain the best possible curb appeal at your property.

As fall approaches, our crews perform the second or third pruning service and begin the fall cleanup process. Perennials and grasses are flush cut as needed and leaves are removed or mulched on site. Warm season contracts are available in eight equal monthly payments or on a per occurrence payment schedule. Couple our warm season landscape services with our four-month winter season services to have a planned budget twelve months out of the year.

SNOW & ICE REMOVAL

We provide a reliable and responsive snow removal service to keep your property safe for customers and employees. We allow your business to operate with as little interruption as possible by providing a high level of service, meeting both the snow-plowing and salting needs of all of our commercial customers.

We efficiently and effectively initiate automatic services based on the type, timing and intensity of each winter weather event. Ideally, you won't ever need to call us, however, we are always ready to respond to your requests and are available during the winter months to serve you 24/7.

Ask about our seasonal pricing and monthly payment options for your property!

Services We Offer:

- *Plowing of parking lots and loading docks*
- *Salting of parking lots, using bulk rock salt to keep our prices competitive*
- *Shoveling of walkways and public sidewalks as applicable*
- *Ice melt application on sidewalks and entrance-ways*
- *Loader work, including removal and re-stacking of snow piles*
- *All-inclusive seasonal quotes available to control monthly budgets*
- *Per occurrence contracts*

VEGETATION CONTROL & TURF FERTILIZATION

Services We Offer:

- *Turf Fertilization*
- *Broadleaf Weed Control*
- *Grub Control*
- *Right of Way Maintenance*
- *Vegetation Control*
- *Mechanical Mowing*
- *Brush Hogging*
- *Herbicide Application*
- *Aquatic Safe Herbicide Application*
- *Woody Brush Control*

Commonly provided in our warm season landscape package is a four-application turf fertilization program. Our staff is equipped with the most efficient application equipment in the industry. Utilizing state of the art ride on spreader / sprayers, we are able to service any size property and offer competitive prices. Our standard turf fertilization program includes four slow release fertilizer applications and three broadleaf weed control applications. Ask about grub control and how we can provide treatments to prevent damage to your lawn.

Another great addition to our warm season package is vegetation control. We have the equipment to manage all sizes of gravel parking lots as well as large right-of-ways. We offer bare ground control and woody vegetation control. Our equipment can access sites off road and effectively spray up to 60 feet from the applicator. Brush hogging, string trimming, brush cutting, and herbicide applications are all services we frequently provide to our commercial customers.

HARDSCAPE & LANDSCAPE INSTALLATION

Hartman Landscaping is equipped to maintain existing landscape while providing professional design and installation of new landscapes for commercial installations and residential properties. We can customize paver walkways and patios to suit your individual needs. Patios often include a sitting wall or retaining wall for aesthetics or function offering a vast array of styles, textures, and colors for infinite possibilities.

In addition to softscape and hardscape installation services, we specialize in low-voltage LED and traditional landscape lighting to enhance the elegance of your property. Whether it's showcasing a Japanese maple with a soft under glow, using a careful play of shadows or highlighting the corner of your home or office, lighting can add extra curb appeal to any location.

Grading and seeding is an important step for any landscape project. Spring and fall are the perfect times to grade or seed your lawn. Whether it's a new lawn or one in need of repair, our team will walk you through all the steps. We specialize in grading, seeding, and sod installation.

Site preparation is key for any lawn. We offer soil tests and use an independent lab for testing, which allows us to pinpoint your individual turf needs, while specializing in both commercial and residential lawn management.

Services We Offer:

- *Landscape & Hardscape Design*
- *Tree & Shrub Planting*
- *Paver Patios & Walks*
- *Retaining Walls*
- *Water Features*
- *Landscape Lighting*
- *Grading & Site Prep*
- *Erosion Repair & Control*
- *Traditional Seeding*
- *Hydro Seeding*
- *Temporary Seeding*
- *Sod Installation*
